Tokyo From a Bird-eye’s View

The World Trade Center Building (WTCB) welcomes you to the Seaside Top Observatory.

WTCB, which completed a major renovation of the World Trade Center Observatory in March 2009 -- also known as Seaside Top because of its fantastic view of the Tokyo Bay area -- welcomes visitors to experience Tokyo from above.

The Observatory for many years since the opening of the building in March 1970 has welcomed countless visitors from around the world. With its renovations, it now boasts a sophisticated and relaxing atmosphere for more than just experiencing a 360 degree panoramic view of the city of Tokyo, the Miura and Boso Peninsulas, Mt. Tsukuba and Mt. Fuji. It is an ideal venue for wedding ceremonies, parties and small meetings.

The observatory is the best venue to view the Tokyo Tower, which in 2009 marked its 50th anniversary celebrated in the WTCB at the Tokyo Kaikan on the 39th floor, where many weddings are celebrated annually.

The panoramic night view of Tokyo Tower, combined with the night lights of the city, offers a chance to see Tokyo from a bird’s-eye view some 152 meters above the ground.

WTCB was until 1971 the tallest building in East Asia. In Spring 2012, visitors to the observatory will be able to see the 634-meter Tokyo Sky Tree, the newest Digital Terrestrial Broadcasting Tower being built in Tokyo’s Narihirabashi/Oshiage area.

As a landmark in Hamamatsucho, Tokyo, WTCB also houses a wedding hall, a major bus terminal as well as commercial facilities.

WTCB Observatory combines an unmatched scenery and convenience for business and leisure.
Ideal View of Tokyo Bay!

The Observatory is easily accessible by using the dedicated elevator on the first floor, a non-stop ride to the 40th floor. At the reception desk on the first floor, visitors can purchase their tickets to the Observatory: adults and high school students, 620 yen; junior high school and elementary school students, 360 yen; and preschoolers, 260 yen. Special rates are available for groups with 15 or 30 members or more.

The Observatory is available for public viewing from 10 a.m. to 8:30 p.m. daily, with exception on certain days when special events are held during summer-time for fireworks over Tokyo Bay and the winter holiday season such as Christmas.

Public transportation to the WTCB is available via the JR Yamanote Line, the JR Keihin Tohoku Line, the Tokyo Monorail, each connecting to the Hamamatsucho station. Also, the Toei Oedo and Asakusa Subway Lines connecting to Daimon subway station.

Below, inside the Observatory where visitors can view the city in all four directions.
As Japan looks to further expanding the number of visitors from abroad to 20 million through its Visit Japan Campaign, WTCB fully embraces such efforts. WTCB can provide special rates for visitors from overseas.

The WTCB, which celebrates its 40th anniversary in 2010, is a member of the World Trade Centers Association (WTCA) headquartered in New York City in the U.S.
